Based on HHS Guidelines Published 1/18/18 Federal Register

A family unit is either an unrelated individual (one person) or a family. A family is a group of two or more persons related by birth, marriage or adoption who live together; all such related persons are considered as members of one family. (Persons who live together as husband and wife are considered to be married for purposes of this definition.) For more detailed definitions of who is related see the Federal Register referenced above
