

## **Dr. Francisco Limon accepts position as CICSO**

Dr. Francisco Limon recently accepted the position of Chief of Integrated Care Services Officer at Greene County Health Care (GCHC). Most recently, Dr. Limon served as GCHC's director of Behavioral Health.

In his new role, Dr. Limon will continue to oversee our Behavioral Health Services department, on site and off site Case Management/Health Education, and Outreach & Enrollment.

Dr. Limon will also oversee the newly formed Neighborhood Health Services department (NHS).

NHS is a revamp of Farmworker Services. The new name more clearly and accurately defines the services GCHC offers, including care to the homeless, veterans, migrants, farmworkers and other members of our community who are unserved and underserved.

Dr. Limon's educational and professional work experience make him an excellent choice to move GCHC forward in this new endeavor, Smith says.

Dr. Limon earned his PhD in Medical Family Therapy from East Carolina University's Department of Child Development and Family Relations. He earned his master's degree in Couple and Family Therapy from Purdue University at Calument in Hammond, Ind., and his bachelor's degree in clinical psychology with a minor in industrial/organizational psychology from the University of Illinois at Chicago. He received his associate's degree in liberal arts from St. Augustine College in Chicago. Dr. Limon has 30 years of experience in mental health.

His research interests include health disparities, stress, diabetes, depression and other chronic conditions, health care policy development and review, and program development, implementation and evaluation.
